Web Developer & Lead Application Engineer   **2019 - Present**
Silberman Law Offices, LLP   **Orange, CA**
- Developing and perfecting previously bespoke file management and accounting program solutions using VBA and associated libraries to improve functionality and increase marketability of program.
- MS Access functionality improvements including application integration with MS Office Suite.
- Creating and implemented new program functions including: ability to create calendar events directly from Access into MS Outlook calendar; automated creation of self-populating Word templates from SQL strings within the database; and adding custom signatures per user on each signed report using bitmaps.
- User training on new and improved functionality with constant and direct feedback from users to streamline functionality and improve user experience to fit the needs of the end user.
- Working with firm partners to develop creative solutions for any design requirements, such as a new business logo and color palettes to be implemented throughout the firm's recent re-branding and for use on their website, business cards, letterheads, and more.

Freelance Web Developer   **2018 - Present**
Self Employed   **Sunnyvale, CA**
- Freelance Development & I.T. Solutions
- Created customized websites for companies and individuals.
- Designed, built, and maintained websites for small businesses utilizing direct communication to provide support for web hosting, domain maintenance, and DNS migration.

$

Front End Web Developer - UI/UX   **2015 - 2018**
Exterro, Inc.   **Portland, Oregon**
- Worked with a small local team to design, prototype and develop the front end of a suite of web applications for a legal technology company.
- Distilling complex problems into smaller and manageable tasks in order to handle difficult requirements.
- Collaborated with a larger international team of developers in order to fulfil backend application requirements.
- Troubleshooting, bug fixes, code review, and refactoring were regularly assigned.
- Frequent communication with Project Managers in order to figure out the stress points of the application in order to redesign or refactor existing modules in the product.
